ACKNOWLEDGEMENT

The Satisfaction that accomplishes the successful completion of any task would be incomplete without the mention of the people who make it possible and whose constant guidance and encouragement crown all the efforts with success.

It is my privilege and pleasure to express my profound sense of respect, gratitude and indebtedness to our guide **Prof. S. A. Rewatkar**, Sr. Lecturer, Department of CW, SDEC (1449), for her constant guidance, inspiration, and constant encouragement throughout this project work.

I wish to express my deep gratitude to, HOD, **Prof. D. M. Nagrale**, Department of CW, SDEC (1449), Chandrapur for his cooperation and encouragement, in addition to providing necessary facilities throughout the Mega project work

I sincerely extend our thanks to **Prof. M. Z. Sheikh**, Principal, and Somayya Diploma in engineering, Chandrapur for providing all the facilities required for completion of this project.

I am thankful to all the Teaching & Non-Teaching faculty of CW Department and Librarian of Somayya Diploma in Engineering for all their good wishes, their helping hand and constructive criticism, which led the successful completion of this project. Finally, thanks to my parents, friends and all those who directly and indirectly helped me in many ways for completion of this project.

THANKING YOU!

ABSTRACT

The COVID-19 pandemic has had a profound impact on the world, affecting millions of people across the globe. In response to the unprecedented challenges posed by the pandemic, a responsive COVID-19 website has been developed to provide a comprehensive resource for information, resources, and updates related to the virus. This abstract outline the key features and functionalities of the website, highlighting its responsive design, user-friendly interface, and rich content.

The website has been designed with responsiveness in mind, ensuring that it adapts seamlessly to various devices, including desktop computers, laptops, tablets, and smartphones. This allows users to access the website on any device of their choice, making it highly accessible to a wide range of audiences, including individuals, families, healthcare professionals, and policymakers.

The user interface of the website is designed to be simple and intuitive, providing a seamless experience for users to navigate through the different sections and find relevant information easily. The website's homepage features a clean and organized layout, with clear headings and sections that provide an overview of the site's content. The menu bar provides quick access to key sections, such as information about COVID-19, prevention and safety measures, testing and vaccination resources, and updates on the global situation.
